 EMC Fittings Manufacturer From China

Product Catalog: HM-SC SERIAL RF SHIELDING CABINET
 Material: Galvanize Steel Plate
 Product Serial: HM0448022H080000

HM Electronic Equipment Co., LTD design and manufacture RF shielding cabinet base on customer's requirement.

HM-SC serials RF shielding cabinet made by 2mm thickness galvanize steel plates, processing by cut, punch, welding, paint and coating. Available in a wide field for RF shielding purpose. It's available for custom made, include outer size, inner size, door clear size, connector panel and other special wish.

We offer the EMC/EMI engineer new versatility to meet EMI EMC, environmental, and mechanical requirements of system specifications.

HM RF Shielding Door Advantages:

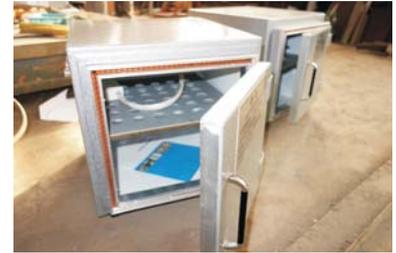

- * Nickel coating beryllium copper finger structure offer the best RF shielding performance
- * Easy maintenance structure, all beryllium copper finger assemble by U sharp clip, easy out and easy in
- * Available for Connector selection
 AC Power/ DC Power/ DB25 / DB37 / BNC / N / SMA/ 7/16 Rj45 / Optic Fiber / Waveguide / Custom
- * High quality surface coating, galvanize coating and plastic coating
- * Custom design for Outer / Inner / Door Clear Size
- * Custom for cabinet structure
 One Door / Double Door/ Front Door/ Upper Door /
- * High performance with the reasonable price
- * The choice of many famous company around the world
- * Customize clear size and frame size base on our customer requirement

Technical Parameter

ELECTRONIC FIELD

Freq.	Atten.	Freq.	Atten.
14K	60dB	100M	100dB
50K	70dB	400M	100dB
100K	80dB	1G	100dB
1M	100dB	6G	100dB
10M	100dB	10G	100dB

** The data above is from the cabinet for Ericsson, only for reference purpose, the cabinet performance could be custom made as customer's requirement.
